9. Ans B. it shall be launched in sub orbit not low or higher orbit. A sub-orbital spaceflight is when a spacecraft leaves the gravitational field from which it was launched and travels through space on a trajectory that crosses the atmosphere or surface of that body. In that case, the spaceflight is unable to complete revolving an orbit. Sub-orbital missions are aimed at lower altitudes than an orbit. These are considered crucial as experimentation before the launch of a spacecraft in an actual orbit.
10. B. These occurred in Blue Nile province of Sudan.
